Attention of Kristy Scott

Dear Kristy

RE: Soya Shipment to ARM Burundi

Further to your e mail dated 29th September 2000, we would firstly apologise for the delay in sending our report on the distribution of the VitaPro Soya. This was due to major problems which our Burundi organisation encountered with the local customs.

The goods were a great blessing to the peoples of Burundi and we would thank World Emergency Relief for their help and generosity.

A report is now attached and an original copy will be posted to you including photographs of the distribution and some of the projects where we were able to use the Soya.

In Burundi and Congo soya is an important food product since there is a major problem with protein deficiency and starvation. Your gift was an excellent contribution to our work and to the people we serve.

Finally, we would point out that our analysis is not as complete as we would desire. This is due to a new logistician being used to prepare the report. We trust however that it will be of benefit to you. If you need copies of the photographs to use or pass on to the donors please let us know.

We are very open to receiving further consignments on a regular basis.

Yours sincerely

Rita M Haxton
