VitaPro Foods Inc.

Montreal, Quebec, Canada

31. July. 2000

Dear President of VitaPro Foods Inc.

Hello

We hope you have been well and everything is gracious for you.

As for the vita pro, most of all we have to express our deep appreciation for sending it to us. We have been to Pyung Yang since this July 11 to 18. At that time we could witness the vita pro is used for children who are in condition of malnutrition. It was really touching to see the children getting better and healthier after taking vita pro. Thank you for making it happen.

Vita pro was being distributed out to childcare houses and children hospitals and was fed mixed with daily food. According to Ja Soon Hwa, chief doctor of Pyung Yang 1st hospital, after 10 days taking vita pro, children showed 16g of weight increase. The number of children hospital that is having this benefit is 12 provincial hospitals and 220 county hospitals, said Jang Duk Young, staff of Chosun Medical Association.

According to the report of WHO in 1998, 15.6% of children of North Korea are suffering from chronic malnutrition and 61.3%, severe malnutrition. So your vita pro is really the vital nutrition to get the children out of malnutrition.

The vita pro you sent us have been using well so far but thinking all children in North Korea there are still needs for it. So we expect you kindly send us more vita pro that more children can have this benefit.

As soon as possible we will send you the photos of children eating vita pro we took in Pyung Yang at recent visit and KWF p.r. videotape. Until then, I hope this letter will help you understand how the vita pro works.

We always have gratitude for your concern and help. We send you all our warm heart from KWF. Thank you.

Sincerely  
Kim Hyoung Suk,  
General Secretary of Korean Welfare Foundation.
