

Thank you for supporting International Medical Corps

Tuesday, April 12, 2011

Dear yank barry,

Thank you for your very generous donation. Because of your support, International Medical Corps is helping the world's most vulnerable populations make the transition from relief to self-reliance.

Every year, 250 million people are devastated by armed conflict and natural disaster. Your donation enables International Medical Corps to respond to these emergencies, while laying the foundation for long-term recovery and development. Your generosity and commitment are restoring hope and delivering health care, food, clean water, sanitation, and mental health support to those most in need.

Every dollar in private contributions generates on average more than \$30 in additional grants from institutional donors, and donated medicines and supplies – multiplying the impact of your dollar.

We appreciate the confidence you have placed in us, and look forward to your continued support.

All the best,

A handwritten signature in blue ink that reads 'Nancy'.
